

## Landology

We, MC Environmental Solutions, inc. (MCES), have worked with Landology for over 10 years because they are by far one of the best land restoration companies we have ever worked with. Their knowledge of land preparation, seeds and plants, fertilizers, and hydraulic application has impressed us as well as our clients; and that is why we consistently call them in on projects. Not only are they knowledgeable in land restoration, but they are very efficient as well. Landology responds quickly when called, they listen to the client as far as the needs of the project, they offer solutions based on those needs and are ready to perform the work when required.

MCES has worked with other land restoration companies that were contracted by the client only to have the client ask for recommendations for an alternative land restoration company after the other land restoration company failed to perform and meet the re-vegetation requirements. We always recommend Landology as our first choice. They have never let us down, and the clients are always pleased with the recommendations and results of Landology's work.

Respectfully,

Michael Chase, CPESC, CPSWQ, CESSWI, QSP/QSD
